To whom it may concern,

My name is Masahiro Kaga, and I am deeply passionate about Full Stack and Dev Ops roles. With a robust background from Langara College and Bootcamp, I have extensively expanded my expertise in both Frontend and Backend development.

At my recent position at Bittreo, I seamlessly took over from a previous development team and spearheaded the redevelopment of the company's critical web applications, including a cryptocurrency app and the official website. My responsibilities spanned from setting the technical vision, architecture to the overall execution of all technical development.

My proficiency extends to a wide range of tech stacks, including but not limited to Vue.js, AWS, Docker, WordPress, PHP, MongoDB and so on. The complete details of the tech stacks I've worked with can be found in my resume.

I firmly believe that with my background and hands-on experience, I am poised to contribute significantly to challenging projects and collaborative team endeavors. I invite you to explore my comprehensive skill set showcased in my portfolio:
<https://masaportfolio.netlify.app>.

Attached is my resume for a deeper insight into my professional journey. I appreciate your time in reviewing my application materials. Please don't hesitate to reach out to ask me. I am eager to bring my expertise to new challenges and look forward to the potential of contributing to your team.

Sincerely,

Masahiro Kaga
